Projects / Experience

The J Store

A static online shopping website that showcases my skills in JavaScript using product filtering, cart handling functionality and SEO practices

 [View Project](#)

Tailwind Landing Page

In this project, I explore my tailwind skills while building a landing page

 [View Project](#)

To Do List App

This to-do app was built using JavaScript to help users stay organized and productive. It allows you to add, delete and mark tasks as complete with a simple and clean interface. The app stores your tasks in the browser using local Storage
